#### Small print:

If you supply your own bike it must be of the correct size and in a roadworthy condition. If the instructor considers it unsafe then the course/lesson will be cancelled. A road worthy bike has air in its tyres and brakes that can be worked by the user of the bike especially important if this is a child.

A lesson should go ahead in almost all weather conditions. However should either side need to cancel for any reason it is only fair to give as much notice as is practical.

#### Useful notes:

We can provide a cycle useable by most if not all trainees but this cannot be hired out. We supply Hi Vis jackets for all trainees to use if they wish.
